To whom it may concern:

During the last eight years, we at Hoar Construction have contracted with Colorado Hardscapes to install decorative hardscapes on several retail projects on the front range in Colorado. These projects include Aspen Grove in Littleton, The Shops at Briargate in Colorado Springs, The Promenade Shops at Centerra in Loveland, and Front Range Village in Ft. Collins.

Although Colorado Hardscapes was not always the low bidder on the job, we found them to be cost competitive. The value Colorado Hardscapes provided in quality, responsiveness, meeting schedules, and partnering with us to turn out great projects on time is unparalleled.

Colorado Hardscapes has packaged the various elements of the exterior hardscape into their scope of work, making job coordination and the flow of work easier to manage. They have not only installed decorative concrete flatwork for us, but also have included water features, firepits, masonry work, retaining walls, seat walls, concrete pavers, stone paving, area drains, trench drains, site furnishings and playground features pretty much whatever the hardscape plan required.

We have worked with several different project managers and foremen as well as dozens of crew members at Colorado Hardscapes. In all the cases, their cooperative, professional performance has made it a pleasure to do business together.

After seeing both the good and the bad in hardscapes contractors, we heartily endorse Colorado Hardscapes as the best we have seen and we look forward to working with them in the future.

Sincerely,

William S McFarland
Project Superintendent
